BUSINESSES PRESENTATION

Liferay Expertise

By building a vibrant business, making technology useful, and investing in communities, we make it possible for people to reach their full potential to serve others.

INTRODUCTION

Digital Transformation is a continuous process and no matter where your company is in the process, we help you understand every facet of change and help you achieve your business goals. We understand the challenges that you deal with, from heightened customer expectations to rising competition and offer a suite of digital services that aim to make your organization think, work and collaborate, cohesively.

Liferay Digital Experience Platform (DXP) is designed for creating exceptional, consistent customer experiences across web and connected devices. Leverage the features that tackle with specific challenges around cloud technology, digital tools for your infrastructure and customer experiences initiatives. At GIKS, we offer a full range of Liferay services that include consulting, development and support. Prepare your business for incoming changes with Liferay DXP.

With GKS Liferay portal development, your company gains a centralized, virtual space where employees can collaborate and share information with various levels of user rights.

Liferay Development

We give legacy implementations a new life with our Liferay Migration services. With a thorough understanding and assessment of your existing setup, we help you upgrade your applications.

Liferay Performance Tuning

Our developers follow best practices to deliver an ideal portal and to ensure everything works at its best, they test the entire Liferay project to the limit, fine-tuning any issues and discrepancies.

Liferay Support

Our dedicated and experienced Liferay developers provide end-to-end support for all Liferay implementations resulting in smooth processing of different functionalities of Liferay projects.

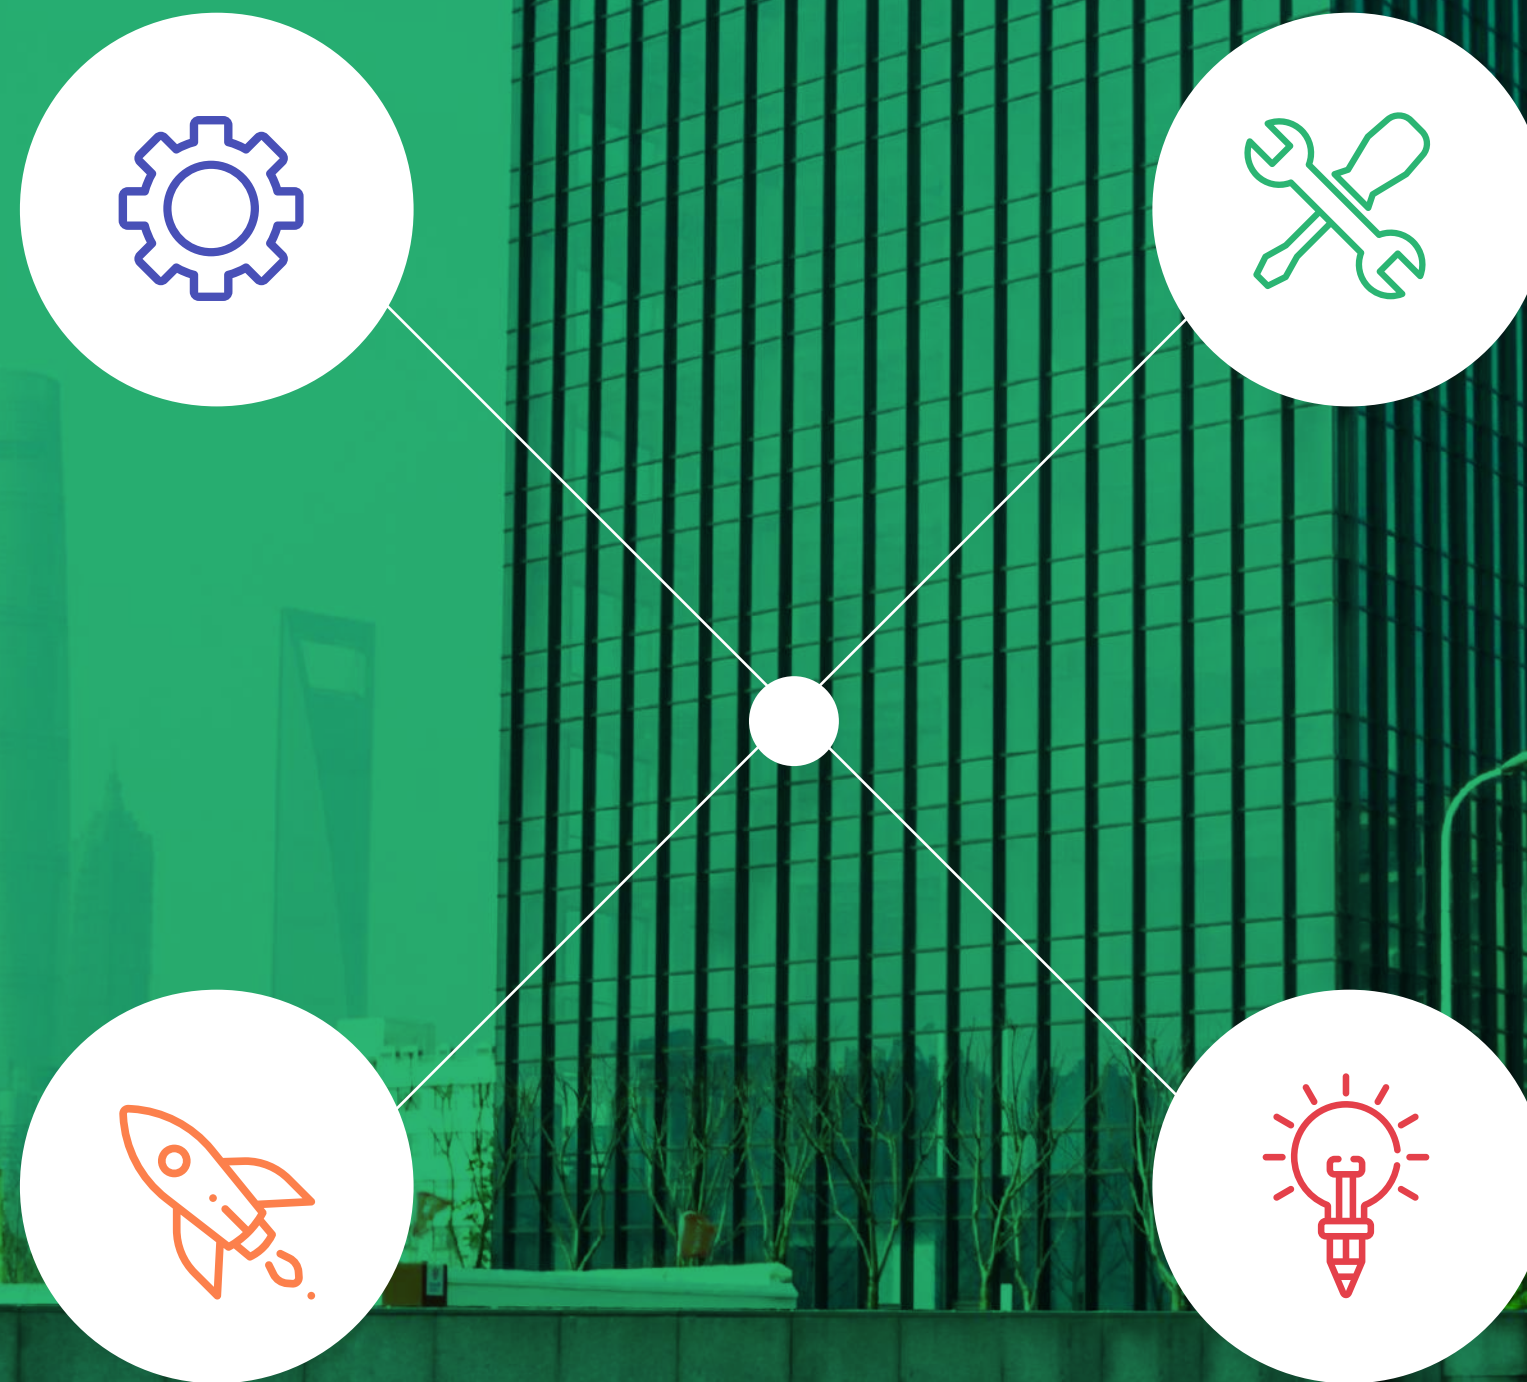

Custom Integrated Solutions Development

Our dedicated and experienced Liferay developers provide end-to-end support for all Liferay implementations resulting in smooth processing of different functionalities of Liferay projects.

LIFERAY DEVELOPMENT
